From Idea to PyPI: A Play in 3 Acts

@hynek

Act 1

Development

Project Information

`attrs` is released under the MIT license, its documentation lives at Read the Docs, the code on GitHub, and the latest release on PyPI. It's rigorously tested on Python 2.7, 3.4+, and PyPy.

We collect information on **third-party extensions** in our wiki. Feel free to browse and add your own!

If you'd like to contribute to `attrs` you're most welcome and we've written a little guide to get you started!

Pull Request Check List

This is just a reminder about the most common mistakes. Please make sure that you tick all *appropriate* boxes. But please read our contribution guide at least once, it will save you unnecessary review cycles!

If an item doesn't apply to your pull request, **check it anyway** to make it apparent that there's nothing to do.

- [ ] Added **tests** for changed code.
- [ ] New features have been added to our Hypothesis testing strategy.
- [ ] Changes or additions to public APIs are reflected in our type stubs (files ending in `.pyi`).
  - [ ] ...and used in the stub test file `tests/typing_example.py`.
- [ ] Updated **documentation** for changed code.
  - [ ] New functions/classes have to be added to `docs/api.rst` by hand.
  - [ ] Changes to the signature of `@attr.s()` have to be added by hand too.
  - [ ] Changed/added classes/methods/functions have appropriate `versionadded`, `versionchanged`, or `deprecated` directives.
- [ ] Documentation in `.rst` files is written using semantic newlines.
- [ ] Changes (and possible deprecations) have news fragments in `changelog.d`.

If you have *any* questions to *any* of the points above, just **submit and ask**! This checklist is here to *help* you, not to deter you from contributing!

Travis CI joins the Idera family

Jan 23, 2019 | Konstantin Haase | NEWS

When we started working on a Continuous Integration solution back in 2011, it was hard to imagine what Travis CI would become. Years later, we're still continuously working to make our community and the tech industry better and stronger. Today we are excited to announce that Travis CI has been acquired by Idera, Inc. Idera is the parent company of many software productivity tools and will support us in delivering quality software to all of you, our users.
